

Protecting and improving the nation's health

Report: East Midlands research workshop

Nottingham

March 2017

About Public Health England

Public Health England exists to protect and improve the nation's health and wellbeing, and reduce health inequalities. We do this through world-leading science, knowledge and intelligence, advocacy, partnerships and the delivery of specialist public health services. We are an executive agency of the Department of Health and Social Care, and a distinct delivery organisation with operational autonomy. We provide government, local government, the NHS, Parliament, industry and the public with evidence-based professional, scientific and delivery expertise and support.

Introduction and overview

During the 2016/17 financial year, the Research, Translation and Innovation (RTI) division has been working with PHE centres to strengthen links between public health academics and others across the public health system via research workshops to explore public health research needs and priorities in their local areas.

Over the last year, we held 2 such meetings:

- North West Research Workshop Manchester 4th October 2016
- East Midlands Research Workshop Nottingham 13th March 2017

There are 2 more planned for the 17/18 financial year; in the East of England and West Midlands and discussions are underway with other areas, aiming to cover each of the 9 PHE centres by the end of 18/19 financial year.

These regional workshops have included an overview of research priorities from different stakeholder perspectives; PHE Centre, Local Authority and Clinical Commissioning Groups, along with an opportunity for discussions, workshops and a Dragon's Den session with pump priming funds available to enable local research projects to be further developed.

Each of the workshops has been developed with input from a lead in the PHE Centre, the Head of Academic Public Health Support in the RTI division and an academic or other public health professional colleague(s).

In addition, the RTI division has supported the PHE national teams of the Dental and Oral Health team and Chief Nurses Directorate in creating and supporting meaningful academic networks. Further information about these workshops is available on request and this work will continue in future years.

This is the report for the East Midlands Research Workshop; which was developed by Ann Crawford, Consultant in Health Improvement, PHE East Midlands Centre, Professor Derek Ward, Head of Centre for Health and Social Care Research, University of Derby (and Public Health Advisor to Derbyshire CCGs), Nicola Hodgkiss, Head of Academic Public Health Support, RTI Division, and Sally Bassett, South Derbyshire CCG Quality Improvement Collaborative, South Derbyshire CCG.

Attendees

There were 46 attendees, made up of academics and public health practitioners from the East Midlands Region along with some voluntary sector and patient representatives. Appendix 1 shows a list of attendees with their employing organisation.

Research needs and priorities in the region

We heard about research needs and priorities for the region from 3 different perspectives:

- Dr Meng Khaw, Centre Director, PHE East Midlands
- Dr Liz Orton, Consultant in Public Health, Leicestershire County Council and Associate Professor or Public Health, Nottingham University
- Dr Tim Parkin, GP, Limes Medical Centre, Alfreton and Mr Jim Connolly, Chief Nurse, NHS Hardwick CCG

A table at at the end of the document gives a summary of the research needs highlighted.

Themes

Reassuringly and perhaps unsurprisingly there were some common themes in the presentations. These are as follows:

- requirement to better understand the diverse population in the East Midlands and therefore the research needs of the different communities
- better joining up of existing resources in the region to work collaboratively to improve the health of the local communities – ie joining up service delivery practitioners with research community to bring the two closer
- research into what works well for the health of the public in the region to help CCGs and local authorities when making funding decisions
- and following from this how can research findings be 'translated' to make them more useful to service development?
- shared expertise around evaluations and health economics
- better translational research how does research work in practice
- the role of the voluntary sector needs more exploration data could be an opportunity, recruitment too and implementation opportunities
- the whole of the research continuum can be of use from portfolio studies to evaluations student projects, all have a role to play
- matchmaking across the system is required
- the local picture is as important as international and opportunities close to home should be explored

Presenters and an overview of content

Dr Felix Greaves, Director of Science and Strategic Information at PHE introduced the day's vision for bringing people together to increase the amount of PH research across the region. Focusing in on:

- the importance of regional networks to coordinate discussions in new ways
- the role of narratives to support the need for research
- consideration of improvement and prevention in health and care
- the goal of creating the best evidence to guide decision making
- the vital role of partnership working to move the ph agenda forwards

Professor David Rowbotham, Clinical Director of the East Midlands Clinical Research Network (CRN) spoke about the research infrastructure in the East Midlands focusing on NIHR support.

Professor Mike Hannay, Managing Director of the East Midlands Academic Health Science Network (AHSN) spoke about translation and public health research highlighting funding available in the NHS for research and development vs spread and adoption.

Professor Derek Ward, Head of Centre for Health and Social Care Research at the University of Derby and Public Health Advisor to Derbyshire CCG's presented Why Weight? - an example of locally focused research which helped CCGs target commissioning and resources to the right communities and people.

Mrs Anne Brice, Head of Knowledge Management at PHE presented on knowledge management and the tools and skills of research.

Dragon's Den session

As part of the day, we invited researchers to pitch ideas to a panel in a Dragon's Den type exercise. All those on the initial invite list were invited to submit an idea to present and there were 3 volunteers:

- Dr Stuart Maitland-Knibb, Clinical Director, Lakeside Plus Ltd; New Model for Pre-Hospital Urgent Care
- Professor Pip Logan, Occupational Therapist, The University of Nottingham; *On line falls prevention tool*
- Dr Andy Ward, GP Partner and Education Lead, Lakeside Healthcare and Senior Clinical Educator, Leicester Medical School; *Can Health Care Assistants provide the key to improved cardiovascular risk?*

The panel was made up of most of the speakers, a patient rep and a representative from the Voluntary and Community Sector. Each pitch had 15 minutes with at least 5 minutes being available for questions.

The winning pitch was '*New Model for Pre-Hospital Urgent Care*' and £5,000 has been passed to Lakeside Healthcare to allow them to take this work further. The proposed use of funding was to; develop this approach formally with EMAS/UHL as a pilot proposal for 6 months with collection of further data, explore the possibilities of using point of care testing to augment capability of RV team to further reduce admissions and explore further outcome data of people admitted and not admitted to hospital.

Next steps and conclusion

Ann Crawford will work with Professor Derek Ward to come up with an action plan to take some of the emerging themes forward.

An update on the research project in receipt of the pump priming funds will be sought in 12 months.

This report will be shared with colleagues from the NIHR public health research programme board for information.

On the whole, the day was really useful and evaluations were very positive. Lessons have been learnt for future sessions and these will be incorporated/avoided when programmes for other regions are developed.

Summary of research priorities from different perspectives

PHE Centre	Local Authority	CCG
Health Inequalities in the region – lower deprivation levels than the national average. Wide demographic – inner cities and also rural communities with different needs that need to be considered. Do we need to refine our understanding of inequalities? Signpost to PHE intelligence may be made more use of.	Research needs to look at the whole system in a complex setting and take into consideration the different communities people live in. What are the shared risk factors of the different groups in the East Midlands?	Recognition and understanding of different communities and diverse population in region and their health needs
Six outcomes where region is worse than England average. Need prospective and retrospective research to understand and help - Breastfeeding initiation Antenatal Sickle Cell and Thalassaemia screening Chlamydia screening Dementia Prevalence Uptake of flu vaccinations The rural health agenda	 Research relevant to policy – Integrated lifestyle services Evaluation of social prescribing Health economics expertise – how can we get this into LA? Intervention development – social marketing and behaviour changes STP environment for commissioning 	CCGs have a statutory duty to engage in research but this needs support – patient participation is key, PC and SC need capability and capacity building
GCSE achievement – links between lifestyle and GCSE attainment	Research relevant for the diverse populations – rural and inner cities, new models of delivery, a view to value for money	A whole system approach is necessary, forging closer links between health and care. But pathway research can also be vital
Uptake and follow ups on NHS Health Checks Obesity prevalence	Translational Research – implementation science. Research on getting research into practice – bench to bedside What does this research recommendation look like in the real world? Research funding and policy – joining up of	Lots of primary care practitioners are interested in research – PC data is a huge repository of information. SC likewise. Practitioners could be great leads for research if engaged.

	funding streams, different cultures, development of future workforce, service support costs. With the political context in mind	
Alcohol consumption and hospital admissions	Research relevant for the diverse populations – rural and inner cities, new models of delivery, a view to value for money	
Smoking cessation		
Make use of the East Midlands Partner		
Organisations – how do we work		
collaboratively?		

Appendix 1: Attendees

Name	Job Title	Organisation
Professor Jonathan Nguyen	Clinical Professor of	University of Nottingham
Van-Tam	Health Protection	Nottingham Oite Organ
Julie Wright	Governance and Risk Manager	Nottingham City Care
Professor Pip Logan	Professor of Rehabilitation Research and Occupational Therapist Head of Division of	University of Nottingham
	Rehabilitation and Ageing	
David Liggins	Patient Representative	NIHR
Shirley Mitchell	Head of Research and Innovation	Nottinghamshire Healthcare NHS Foundation Trust
Rod Moore	Consultant in Public Health	Leicester City Council
Kath Roberts	Programme Lead Nutrition and Obesity	Public Health England
Janine Johnson	Public Health Analyst	Leicestershire County Council
Stephanie Webb	Public Health Business Partner	Leicestershire County Council
Anthony Locke	Patient Representative	-
Ruth Doyle	Study Support Service Facilitator	NIHR Clinical Research Network
Dr Hanna Blackledge	Public Health Specialist	Leicester City Council
Maria Ward	Networks and Policy Officer	Nottingham Community and Voluntary Service
Helen Johnston	Specialty Registrar in Public Health	Derby City Council
Anna Follows	Screening and Immunisation Manager	Public Health England
Dr Andrew Ward	GP Partner and Education Lead	Lakeside Healthcare
Dr Stuart Maitland-Knibb	Clinical Director	Lakeside Plus Limited
Ryan Swiers	Specialty Registrar in Public Health	Public Health England
Dr Lucy Gavens	Specialty Registrar in Public Health	Derby City Council
Ann Crawford	Deputy Director Health, Wellbeing and Workforce Development	Public Health England
Nicola Hodgkiss	Head of Academic Public Health Support	Public Health England
Professor Derek Ward	Head of Centre for Health and Social Care Research	University of Derby
Sally Bassett	SDCCG Quality Improvement Collaborative / AKI Project Manager	Southern Derbyshire CCG

Dr Felix Greaves	Deputy Director, Science and Strategic Information	Public Health England
Dr Meng Khaw	Centre Director, Midlands and East	Public Health England
Professor Elizabeth Orton	Consultant in Public Health	Leicestershire County Council
Tim Parkin	GP	Limes Medical Centre
Jim Connolly	Chief Nurse and Quality Officer	NHS Hardwick CCG
Professor David Rowbotham	Clinical Director	NIHR
Anne Brice	Head of Knowledge Management	Public Health England
Professor Mike Hannay	Managing Director	East Midlands Academic Health Sciences Network
Harpal Ghattoraya	Research Delivery Manager	NIHR Clinical Research Network
Debbie Jeffrey		NIHR Clinical Research Network
Rachel Hunt	Screening and Immunisation Coordinator	Public Health England
Gillian Carleton-Boylan	Senior Lecturer	University of Derby
Dr Tessa Langley	Associate Professor in Health Economics	University of Nottingham
Dr Reza Safari	Research Fellow	University of Derby
Dr Rachael Murray	Associate Professor of Health Policy	University of Nottingham
Louise Lester	Specialty Registrar in Public Health	Nottingham City Council
Jane Jobarteh	Health and Wellbeing Manager	PHE East Midlands
Jonathan Gribbin	Consultant in Public Health	Nottinghamshire County Council
Kitty Wood	Study Support Service Facilitator	NIHR
Rubina Reza	Research and Clinical Audit Manager	Derbyshire Healthcare NHS Foundation Trust
Dr Isabel Perez	Consultant in Public Health Medicine	Lincolnshire County Council
Neil Chadborn	Research Fellow	University of Nottingham
Ben Anderson		Public Health England
Sue Birchinough		Public Health England
Rob Howard		Leicestershire County Council
